CAREER OBJECTIVE

Aspiring Project Operations Coordinator with hands-on experience in project coordination, multi-site workshop execution, and data analysis. Skilled at managing schedules, maintaining project documentation, liaising with stakeholders, and supporting teams to ensure smooth project execution. Seeking to leverage my organizational, communication, and technical skills to contribute to efficient project operations and team success.

EDUCATION

Bachelor of Science in Information Technology | 2022 - 2026

King's College
Affiliated to Westcliff University, Irvine, California

SKILLS

- **Languages & Frameworks:** Python (OOP), Django, Flask, JavaScript, HTML, CSS
- **Backend & Databases:** REST APIs, PostgreSQL, MySQL, MongoDB, Firebase Auth
- **Tools & Dev Practices:** Git, GitHub, Docker (Basics), Figma, DataGrip, CVAT, Agile workflows
- **Core Product Competencies:** Customer Interviews, Product Specification, Data Analysis, Market Research, Stakeholder Collaboration
- **Soft Skills:** Communication, Presentation, Teamwork, Time Management, Leadership

WORK EXPERIENCE

DigiSchool Global | Feb 2024 - April 2025

Junior Project Associate

- Planned and executed technical workshops across 9 schools, including institutions outside Kathmandu Valley.
- Managed scheduling, logistics, documentation, and technical material preparation for multi-site project delivery.
- Monitored task progress, tracked milestones, and resolved execution issues to ensure timely completion.
- Collaborated with instructors and school stakeholders to maintain quality standards and structured execution.

NextwaveAI | June 2025

AI/ML Data Annotation Intern

- Annotated image and video datasets using CVAT for supervised machine learning models.
- Assisted in data preprocessing, cleaning, and quality validation for ML pipelines.
- Maintained dataset consistency and labeling standards in collaboration with technical teams.

Ambition Guru | July 2025

Data Analysis Intern

- Analyzed large-scale datasets using SQL and DataGrip to generate structured reports.
- Ensured data accuracy and validation across reporting processes.
- Supported business decision-making through clear documentation and analytical insights.

Ncell | August 2025 - October 2025

UAT Backend Assistant

- Supported backend validation during User Acceptance Testing (UAT) cycles for telecom services including phone calls, SMS, and chatbot workflows.
- Assisted in troubleshooting system issues and verifying service functionality before deployment.
- Coordinated with technical teams to document issues and support quality assurance processes.
- Gained exposure to telecom infrastructure workflows and rollout procedures.

PROJECTS

STEM Workshop Coordination – DigiSchool Programs (Phase 1 & 2)

- Coordinated execution of structured STEM workshops across multiple institutions.
- Managed scheduling, documentation, stakeholder communication, and quality monitoring.
- Ensured alignment with curriculum standards and project timelines.

Tech Meetup Collaboration – DigiSchool & Australian Catholic University (ACU)

- Assisted in organizing a large-scale school-level tech event.
- Managed logistics, coordination, and on-site execution.
- Delivered a keynote address to 150+ students and supported stakeholder engagement.

PABSON Program 2081 – Event Support

- Coordinated attendance tracking using digital systems.
- Maintained structured documentation and supported seamless event execution.

ReLoop – Sustainability Web Platform| Django, PostgreSQL, MongoDB, Firebase Auth, Docker

Chairman's Choice Award, DAV Hackathon

- Developed a scalable backend for ReLoop, featuring secure 2FA authentication, AI-based waste classification, and a reward points system.
- Designed RESTful APIs and integrated real-time smart bin tracking with multiple external services.
- Coordinated development workflow using Git, ensuring structured deployment and collaboration across team members.
- Contributed to winning Chairman's Choice Award at DAV Hackathon 2025 for innovation and technical execution.
